seeds, bulbs, plants and cuttings are selected with diligent care as to type, productiveness and freedom from disease so that you may have the best with which to build your prospective crops.

Our interest in you and your crops by no means ends with the sale. We are more than anxious to have the materials we sell, grow and prove profitable to you.

WARRANTY AND LIMITATION OF LIABILITY: Subject to the limitations of liability herein set forth, we warrant that the seeds or bulbs sold are as described on the container, within recognized tolerances. Our liability on this warranty is limited in amount to the purchase price of the seeds or bulbs. In no event shall we be liable for the crop, or for any loss due to the failure, impairment or quality thereof or varietal variance therein, whether such loss results from breach of the foregoing warranty, from breach of any other provision of the buyer's contract for purchase of said seeds or bulbs, or from any other cause.

ANTIRRHINUM (Snapdragon) GREENHOUSE STRAIN

SNAPDRAGON CULTURE

SOIL PREPARATION—A loose, porous soil containing about one-fourth peat moss by volume has been satisfactory in many ranges. Add four or five pounds of superphosphate per 100 square feet of bench area before planting. Thoroughly steam sterilize at least once a year, preferably after cutting off the summer flowering crop. Make sure the soil is uniformly moist and that a temperature of 180 deg. F. is maintained for at least one-half hour. Over-steaming will not harm the soil.

SEED GERMINATION—Snapdragon seeds should germinate in about seven days from the time they are sown. Maintain a constant temperature of 65 to 70 deg. F. and keep the medium uniformly moist especially the top one-half in the flat.

Use neutral peat which has been shredded and screened, or any other loose, porous mixture for your propagating medium. For surest results, the mixture should be steam sterilized in the flats before sowing the seeds. When the seeds have germinated, give them increasingly more sun and ventilation.

DIRECT BENCHING—Consistently good results have been obtained by direct benching from seedling flats. You can do this safely about three weeks from the sowing date. Direct benching saves time and labor and invariably results in more vigorous plants, since there is no hardening or check in growth as sometimes happens when seedlings have been banded or potted.

FERTILIZATION—Maintain a level of about 20 ppm nitrogen and potash (Spurway) during the early stages of growth. Gradually taper off nitrogen feedings when spikes appear. Liquid feedings of 15-30-15, 20-20-20, etc., one every two weeks, are adequate at the rate of one ounce in five gallons of water (one-half pound per 100 gallons).

Summer-flowering crops should be fed heavier than the above schedule to keep pace with the faster rate of growth.

SNAPDRAGON

YODER HYBRID IMPROVED SELECTIONS (New)

ARIZONA

Summer flowering lavender hybrid. Color resembles the spring variety Lavender Lady. Vigor is high. Spikes are long and gracefully tapered. Available October 1959.

COLORADO

Large flowered yellow hybrid. For **late Spring and Fall**. Very uniform and vigorous. Color of Broker's Tip. Available October 1959.

DELAWARE

Ivory white hybrid. Retains and improves for **spring and fall flowering** the valuable traits of Citation. Floret is large, stems heavy with very long spikes. Available January 1960.

FLORIDA

Vigorous light pink **summer hybrid**. Displays superb color retention under high temperature and is highly shatterproof. Spikes are long with compact florets. Available January 1960.

INDIANA

Light rose pink **late winter and spring hybrid**. Equally valuable for early fall. Large floret. Spikes are long and tapered. Available October 1959.

KANSAS

Brilliant golden bronze hybrid for **late Spring and Fall**. A vigorous variety with strong stem and long spikes. Available October 1959.

KENTUCKY

Glorious apple blossom pink. **Late spring and fall hybrid**. A vigorous, clean stemmed hybrid with a minimum of shatter. Available October 1959.

Price of the Above Per Pkt. 3.50

SNAPDRAGON**YODER HYBRID IMPROVED SELECTIONS (New)****MAINE**

Rich purple hybrid. For **winter and early spring**. The florets are very large and beautifully spaced on strong spikes. Available January 1960.

NEVADA

Intense yellow hybrid. Develops a huge floret on vigorous long spikes. Valuable in **May-June and October-November** crops. Available October 1959.

NEW YORK

Smooth light pink. For **winter and early spring**. Displays tremendous vigor and earliness. Spike is large and compact. Very clear pink with minimum of yellow in lower lip. Highly shatterproof. Available January 1960.

OHIO

Pure paper white hybrid for **winter and early spring crops**. Florets are compactly spaced and shatterproof. Available October 1959.

TENNESSEE

A real deep red hybrid. Best suited to **fall periods**. Quite shatterproof with good floret spacing on long uniform spikes. Available October 1959.

VERMONT

Primrose yellow hybrid for **winter and early spring**. Spikes are long and graceful with abundant tip-bud. Stems are hard, clean and uniform. Available January 1960.

VIRGINIA

A vigorous paper white hybrid. For **late spring and fall**. Long spikes, hard, clean stem with good large florets that are shatterproof. Available October 1959.

WISCONSIN

Intense, dark pink **winter and early spring hybrid**. Spikes are long and tapering. Stems are medium and hard. Available October 1959.

Price of the Above Per Pkt. 3.50

ANTIRRHINUM

"ROCKET" SNAPDRAGON F₁ HYBRID

ROCKET F₁ HYBRID

A new strain of Colossal type. Grows about 30-36" tall and produces long full spikes, with many closely spaced florets. This F₁ Hyb. Garden Snap exhibits great vigor and uniformity. Trials throughout the country have demonstrated their ability to produce masses of cut flower quality spikes. This strain is offered in the following colors.

ASTERS (Approx. 12,000 seeds per oz.)

FLORIST STRAIN (Wilt Resistant)

Bred especially for off-season crops under glass. Stems are long and strong, and the long-lasting flowers often measure 4 inches across. Seed is produced each year from specialty selected line-bred planting stock.

Azure Ball—Fully double light blue.

Pink Ball—Large 3½ to 4-inch double flowers on long stems. Rarely shows any center. Blooms mid-August. Excellent flowered under lights in early spring. Needs little disbudding as laterals are few.

Phlox Ball—Double medium large flower of a soft peach blossom pink color.

Rose Ball—Fully double flowers of a good rich rose. Flowers large and solid.

Dark Purple Ball—Similar to Rose Ball, but good deep purple.

White Ball—The large pure white flowers of this new Aster are exceptionally double and borne on stiff stems. Blooms late August.

	Tr. Pkt.	¼ oz.	Oz.
Prices Above:	\$1.75	\$3.00	\$9.60

CONTINUOUS FLOWERING OF ASTERS

Sow Seeds	Pot Seedlings	Bench Plants	Flowering Date Approximate
Dec. 10	Jan. 10	March 1	May
Feb. 1	Feb. 20	April 1	June
March 15	April 10	May 15	July
April 20	May 10	June 15	August
May 20	June 10	July 15	September
June 10	July 1	Aug. 15	October
June 20	July 15	Aug. 20	November
July 10	Aug. 1	Sept. 1	December
July 15	Aug. 10	Sept. 15	January
August 15	Sept. 10	Nov. 1	February
Sept. 10	Oct. 1	Dec. 1	March
Oct. 20	Nov. 15	Jan. 1	April

Plants must be given additional light between September 1 and May 1 regardless if they are in seed flats or in the bench. If the plants are not lighted while in small pots, they develop a rosette of leaves and growth of the stem and flowers is delayed. Plants should be lighted until the first flowers show color.

Low wattage bulbs will suffice for additional light. On a four-foot bench, 40-watt lamps spaced 6 feet apart and about 24 inches above the plants will give ample light for this crop. Spacing is usually 8 x 8 inches in the bench and a 50° night temperature is essential.

ADDITIONAL LIGHTING SCHEDULE

3 hours during the months of September, October, March and April.

4 hours during the month of November and February.

5 hours during the months of December and January.

BALSAM (Approx. 3,300 seeds per oz.)

BEGONIA FIBROUS ROOTED

(Approx. 30,000 seeds per 1/32 oz.)

Fibrous Begonias are a necessity item for spring bedding sales. They are used extensively in combination work and are also popular house plants throughout the year.

Production from seed is simple. January sowing produces plants for spring bedding work. The fine seed is lightly pressed into a sterilized fibrous medium. The seed is kept moist, not covered, and germinates best at 60 to 70 degrees. An economical method has been to shift the seedlings to flats spaced 2 x 2 inches and grow them on until they become crowded. Then transfer to 3- or 4-inch pots.

Potting soil should contain one part peat, one part sand and one part soil—a fibrous medium that will not pack is essential. To keep the plants moving, a temperature of 60 degrees is best. The plants do well in shade or full sun, but are best shaded during the summer.

Try monthly sowings from August to March for a constant supply to meet your customer's demand.

F1 HYBRIDS—Heterosis Varieties

Sold in Packets Only

As pot plants in 3, 4, or 5-inch pots they may be recommended to your customers for they do well in high temperatures and low light intensities of modern homes. F1 hybrids, vigorous in pots, are also excellent bedding subjects in part shade or in full sun. F1 seed produces a uniform crop.

TUBEROUS ROOTED BEGONIAS

Tuberous rooted begonias from seed are an inexpensive crop to produce. Sow in mid-January and shift about May 1 for early June sales. They are the answer for customers looking for a brilliantly flowered plant for the shade.

Tr. Pkt.

Mixed — Camellia flowered
double type, plants 1½ ft.

tall \$3.00

CALCEOLARIA (Approx. 20,000 seeds per 1/32 oz.)

The soil used in germinating the seeds should be made up of two parts leaf mold, two parts well-rooted manure, two parts soil, and one part sand. Sterilize the soil and flat with steam to eradicate all disease.

Seed is fine and does not need a soil covering. A night temperature of 60° is recommended for germination. Shift to 2½-inch bands, then to 4 or 5-inch pots for finishing. A 48° house is best after the shift. Spray weekly with parathion for aphid control, and shade from direct sun after February. Overwatering causes yellowing.

GLOECKNERS STRAIN MIXED (New)

Compact plants with medium sized flowers produced on large heads. This mixture has a full color range including red - yellow - bronze - rose - strawberry and mottled.

Seed for 1000 plants \$10.00

CHRYSANTHEMUMS (Annual)

(Approx. 10,000 seeds per oz.)

Another group which is finding favor with florists for cut flower material. Chrysanthemums last remarkably well as a cut flower, but for best results keep them in water 24 hours before marketing. Sow in mid August to follow early Chrysanthemums. Responds very well to additional light.

	Tr. Pkt.	Oz.
Merry Mixture —Gay Tri- colors	\$.40	\$2.25

CLARKIA (Elegans Double)

For spring flowering sow in early January and grow in shallow soil in flats or benches. Keep plants on the dry side as vigorous growth is not wanted.

	Tr. Pkt.	Oz.
Mixed	\$.25	\$2.25

CENTAUREA CYANUS

CINERARIA

Positively do not use soil that was previously used for Mums and especially so if your Mums were affected with Verticillium wilt or Seidewitz disease. Cinerarias are attacked by this wilt which is a soil-borne fungus. It will cause the lower leaves to wilt and die and then gradually kill the entire plant. The only prevention for this trouble is to use new field soil from seed flat to finished pot. Steam sterilize soil. Sow in January for spring combination work. Sow from June on for Christmas and late winter pot plants.

Siter's Hybrids

Trade Mark ®

They are a distinct improvement over the original Siter's Strain, and because they are Hybrids from original crosses, cannot be offered by anyone but the originator.

This is an entirely new group of Cineraria Hybrids, blended for a perfect combination of colors, ranging from bright-eyed types through the finer pastel shades.

These new types carry large flower heads with medium-large individual flowers.

Seed for 500 plants	\$ 5.00

DELPHINIUM

PACIFIC STRAIN (Vetterle & Reinelt) (Approx. 13,000 seeds per oz.)

This is the finest strain of Delphinium yet introduced. From our personal observation in the field, we find this has unquestionably proven to be the leader in Delphiniums of the better type. The flowers are immense, well set on strong, straight stems, do not shatter, and are 40 to 90% mildew resistant. July or August sowing and transplanting into the field during the fall will produce an early crop with large spikes. Delphiniums require a well-drained soil, neutral in reaction. A January sowing, transplanted in the greenhouse and set out in early spring provides a good cut during the summer.

Astolat Series—The color variations in this series extend from **pale blush through lilac pink to deep raspberry rose**. Large brown, fawn and black bees lend interesting contrast.

Black Knight—The individual florets, 2 to 3" in diameter, are **Dark Purple**, beautifully rounded form with heavy velvety texture. Very large well formed spikes.

Blue Bird Series—This series can be recommended as being the **clearest medium blues with white bees**. They carry well formed round flowers 2 1/4 inches in diameter on very long, graceful spikes.

Bluejay Series—Color striking. **Clear medium to dark blue**. Very intense and alive with contrasting bee.

Cameliard Series—A **pure lavender self**, with **white bee**, individual flowers are very round and flat. Excellent growing habits.

Galahad Series—Flowers **Clear White**, averaging three inches in diameter, pyramidal spikes, good branching habit, strong stems with a high percentage of mildew resistance.

Guinevere Series—**Light Pink Lavender self with white bee**. Individual florets 2 1/2 to 3 inches in diameter. For cut flowers and show purposes. Mildew resistance—50 to 70%.

King Arthur—**Brilliant Royal Violet** with large **white bee**. Individual florets 2 1/2 inches in diameter. Excellent for cut flowers. Mildew resistance from 80 to 90%.

Lancelot Series—**Clear Lilac self with white bee**.

Percival Series—A companion to the Galahad Series. Large **glistening white flowers** with strongly contrasting **black bee**.

Round Table Series—This represents all the color combinations of the **Knights and their Ladies** which will eventually be introduced. Some three hundred different crosses were used to make up this group.

Summer Skies Series—**Clearest Light Blue** with **white bee**. Individual florets 2 to 2 1/2 inches in diameter. Ideal for cut flower purposes—Mildew resistance—40 to 60%.

All Colors Mixed—A blend containing all named colors mentioned above.

Prices for all above varieties:

GLOXINIA

Sow in December for 5-inch flowering plants in June. Germination is best if seed is not covered and a 70° temperature is maintained. The soil mixture should consist of a third each of peat, compost, and sand. Never allow the pots to dry and shade lightly, carrying the plants in a 65° house.

	Tr. Pkt.		Tr. Pkt.
Beacon Fire —Light and dark red mixed	\$1.25	Marbotts Pink —This is the pinkest of the pink gloxinias and is not to be confused with the usual rose shade. Short growth with upright flower stems make this an outstanding variety	3.00

KALANCHOE (Approx. 60,000 seeds per 1/32 oz.)

For Christmas flowering, shade the plants with black cloth from September 1st to October 10th, from 5 P.M. to 8 A.M. each day and grow in 60 degree house.

Brilliant Star—Extremely large fiery red flowers. Good for cutting Tr. Pkt. 1/64 oz. 1/32 oz.
as well as pots \$1.00 \$3.85 \$7.00

Improved Tom Thumb—Sport of original Tom Thumb with similar habit, but has florets, larger with more substance and a darker red 3.50 6.50 12.00

Blossfeldiana65 1.75

KOCHIA (Approx. 30,000 seeds per oz.)

Childsi—Oval shaped plants stay green through entire summer season ... \$.15 \$.50

LARKSPUR

(Approx. 9,000 seeds per oz.)

OUTDOOR CUT FLOWERS—Sown outdoors from August 15 to September 15 larkspur seedlings will be large enough to winter over for an early summer crop. A mulch prevents heaving over winter. Good results may also be had by sowing seed outdoors as soon as the ground can be worked in spring. Spaced an inch apart, 1 oz. of seed will give about 700 feet of row.

INDOOR SPRING FLOWERS—A December or January sowing produces 3-inch band or pot plants to follow late mums. Space 1 foot apart each way in ground beds and 10 x 10 inches in raised beds. Plants grow 4 to 5 feet tall and do best in a 45 to 50° house.

GIANT IMPERIAL OR BASE BRANCHING

Blue Bell—Azure blue
Blue Spire—Very deep violet blue
Carmine King—Deep carmine rose
Lilac King—Rich lilac, full double closely spaced florets

Miss California—Deep rose on salmon

MARIGOLDS continued on next page

MARIGOLD TALL VARIETIES FOR CUTTING

(Approx. 10,000 seeds per oz.)

Sown in January or February, the plants spaced 4 x 5 inches and grown single stem produce a profitable crop for spring cutting. African tall doubles and Carnation and winter-flowering sorts are most popular, but the others are also needed for variety. All may be grown for spring plant sales and early fall cut flowers.

CHRYSANTHEMUM FLOWERED TYPES

Ball-shaped blooms measure 3" across. For Spring greenhouse or outdoors.

	Tr. Pkt.	1/4 oz.	Oz.
Glitters —Lemon yellow	\$.35	\$1.00	\$3.00
Goldsmith —Golden orange35	.75	2.25
Happiness —(Medium Dwarf)—About 18" tall. Large flowers of a cheerful golden yellow color. Profuse bloomer35	.75	2.25
Yellowstone —Clear golden yellow35	.75	2.25

GIGANTEA

A remarkable new sweet scented, robust growing extremely large flowered type, ideal for show purposes, florist use and garden decoration. It has also been tested and found good for greenhouse culture.

	1/4 oz. \$1.00	

NIEREMBERGIA (Dwarf Cup Flower)

(Approx. 5,500 seeds per 1/32 oz.)

Sow seed early to have plants in flower for Decoration Day. Excellent plant for edging and general bedding. Will flower profusely during entire summer.

	Tr. Pkt.	1/32 oz.	1/16 oz.
Purple Robe—Deep violet purple	\$.50	\$1.75	\$3.25

PANSIES

(Approx. 21,000 seeds per oz.)

For spring bedding plant sales pansies are sown either indoors in December or January or outdoors from July until September. December- or January-sown plants are carried in a cool greenhouse, transplanted into frames about March and are ready for May sales. Late summer-sown seed outdoors in shaded frames produces large enough plants to be spaced 4 x 6 inches apart in frames, strong enough to carry over winter under a loose mulch. The plants must be well established before winter sets in.

MASQUERADE

SPECIAL STRAIN MIXED

This strain possesses very large blooms on vigorous plants, and is especially good for bedding. The color range is quite good containing combinations of deep rich colors in the red and wine shades. F2 hybrids, the plants have tremendous vigor and giant flowers. Compact plants, they are ideal for basket work.

Tr. Pkt.	1/8 oz.	1/4 oz.	Oz.
\$1.50	\$3.75	\$7.00	\$22.00

MASQUERADE

F2 early and bright-colored variety derived from the Oregon jumbo type. Varied colored in shades of yellow blue, violet, mauve and rust.

SALVIA

(Approx. 7,500 seeds per oz.)

This beautiful scarlet-flowered annual is gaining in popularity and is constantly in demand by homeowners. From July until frost it blooms profusely and is handsome in combination with white and/or pink petunias. It also may be recommended to plant in borders beside chrysanthemums for a striking fall color display. Seed should be sown in March in flats to which bottom heat is given to speed germination. From seedling to finished plant, no soil sterilized with methyl bromide should be used.

STOCKS — Continued

STOCK CULTURE

Stocks are very satisfactory for Winter and Spring flowering. Sowing the seed in August and benching in October, the first flowers may be cut before Christmas if additional light (40-60 watt lamps spaced 5 feet) is used. Without this aid, the crop will come into flower in January. Continuity of bloom may be obtained by successive sowings to about the middle of February. This non-branching type, which has come into general use, should be planted 3 inches in the row and 6 inches between rows, producing a single stem. The branching types should be planted 8 x 8 inches and topped when 6 inches tall to produce side shoots of sufficient length.

Flowering of stocks only occurs when the temperatures are below 60 degrees for the greater part of the night. To secure the greatest percentage of doubling, the largest and most vigorous plants should be selected.

SOWING DATES FOR NON-BRANCHING STOCKS

SWEET PEAS

SPRING FLOWERING

CUTHBERTSON STRAIN

The Cuthbertson Strain is recommended for sowing after November 1. It requires strong spring sun for best bloom.

This strain flowers two weeks later than the early spencers, and two to three weeks earlier than the summer flowering varieties when sown outdoors in the north.

Billy—Bright cerise rose on salmon
Carol—Strong growing clear pink
Coline—Vigorous sunproof scarlet
Danny—Navy blue
Doris—Deep cherry rose
Evelyn—Salmon cream pink
Frank G.—Strong growing lavender

Jimmy—Deep scarlet
Janet—A pure black seeded white
Jessie—Wavy flowers of clear satin mauve
Lois—Rose pink on white background
Robert—Clear medium blue
Mixed

Prices: ½ oz. \$.35

1 oz. \$.55 ¼ lb. \$1.65

TALL CLASS

Alba Pure —Pure white	Kermesina —Crimson
White with eye	Rosa —Pink
Tr. Pkt. \$.30	1/4 oz. \$.60
	Oz. \$2.00

VERBENA (Approx. 10,000 seeds per oz.)

Excellent for window boxes or combinations, Verbenas are also popular for bedding. To hasten germination seed should be sown in a 65° soil temperature. Because the plants tend to sprawl, they are easier to handle during the bedding sale season if they are pinched back early. Once established they may be grown at 50° night temperature.

Gloeckner SPECIAL STRAIN MIXED

A fine mixture of dwarf Verbena for spring bedding plant sales. The plants are very dwarf in habit and have a splendid range of colors containing many of the eye types through the mixture.

Especially adapted to growing in 2 1/4" and 3" pots.

Tr. Pkt.	1/4 oz.	1/2 oz.	Oz.
\$1.00	\$2.00	\$3.50	\$6.00

BUSH-TYPE (Multiflora)

These new "Bush-Type" Verbenas are becoming very popular for their uniform, vigorous and upright growth. Eight to ten inches high, the plants are topped with a dense mass of flower heads.

Firelight —Vivid solid red	Snow White

PERENNIALS

Home gardeners are discovering the landscape beauty of the easy-to-grow perennials listed on these pages. No spring sales yard is complete without a wide selection of perennials in baskets or pots for them to choose from. At present the most popular are *Alyssum saxatile*, *aquilegia*, English daisy, *cerastium*, Siberian wallflower, *campanula*, shasta daisy, *coreopsis*, foxglove, *gaillardia*, *heuchera*, candytuft, *scabiosa*, sweet William, and *viola cornuta*. Seed is best sown in spring for germination is better when the weather is cool. The young plants are spaced in beds in early summer and they winter over well for spring sales. Indoor-sown seed in January or early February also produces saleable spring plants, many of which will be in bloom. Plan now to round out your plant offerings with the popular perennials.

Golden Yellow Self Bleaching—Standard early market variety

\$1.50 \$5.00

Golden Plume—Early, non-bolting variety. Fine flavor, solid and tender

1.50 5.00

Giant Pascal—Stems thick, of fine quality, rich nutty flavor. An excellent variety

1.50 5.00

CABBAGE

Oz. 1/4 lb.

Copenhagen Market—Early, round headed variety. Excellent quality

\$.65 \$2.00

Danish Ball Head (Penn State Strain)—Most popular late variety. Good keeper

.75 2.50

CABBAGE—Continued

Oz. 1/4 lb.

Early Jersey Wakefield (Yellows Resistant)—The earliest oblong variety. Sure header, small heads, suitable for home gardens

.45 1.55

Golden Acre (Yellows Resistant)—The earliest resistant cabbage developed. A SOLID ROUND HEAD OF MEDIUM SIZE

.65 2.00

Wisconsin All Season (Yellows Resistant)—A main crop yellow resistant cabbage. Round head, good quality

.90 3.00

Mammoth Red Rock—Best red variety. Good keeper, round head

.60 2.00

Marion Market (Yellows Resistant)—A resistant Copenhagen Market matures a trifle later

.60 2.00

Premium (Late) Flat Dutch—Large late variety. Very good quality, excellent keeper

.60 2.00

Savoy, Chieftan—Earlier than standard market varieties of Savoy. Plant medium short stemmed

.60 2.00

EGG PLANT

Oz. 1/4 lb.

Black Beauty—An extra early, large variety with few seeds

\$.60 \$2.00

Fort Myers Market—High bush variety. Heat and disease resistant

.80 2.70

Improved New York Purple—Popular home and market garden variety

.75 2.25

LETTUCE

	Oz.	¼ lb.
Bibb (Forcing) — Plant small forming a small loosely folded head, leaves thick, deep green, slightly fringed with brown	\$.30	\$1.00
Black Seeded Simpson —Ideal mid-summer leaf variety, will withstand heat and drought20	.70
Grand Rapids Forcing —The leading greenhouse forcing leaf variety, but may be grown successfully outdoors25	.80
Big Boston —A large headed variety for mid-summer and fall use25	.70
Iceberg —Crisp heading variety for home and market..	.30	1.00
Imperial 847 —Crisp heading variety of medium size. Leaves smooth, thick and light green50	1.70
Romaine (Cos or White Paris self folding) —Medium tall plants with firm spoon shaped straight edged outer leaves30	1.00
Salad Bowl — Improvement over Oak Leaf. Early, stands summer heat exceptionally well. Loose leaf variety75	2.50

ONION

	Oz.	¼ lb.
Prizetaker — Large, globular, yellow. Flesh coarse and mild	\$.70	\$2.30
White Sweet Spanish —White with clear glistening skin. Globe-shaped70	2.30
Yellow Sweet Spanish —(Utah Strain) — Globe-shaped, keeps extra well70	2.30

PARSLEY

	Oz.	¼ lb.
Extra Triple Curled (Moss Curled) — Plants compact leaves dark and finely cut..	\$.20	\$.50

PEPPER

	Oz.	¼ lb.
All Big —(Sweet)—Shaped like World Beater but darker and longer	\$1.20	\$4.00
California Wonder (Sweet) —Much used, particularly by market growers. Large green fruits practically as early as Ruby King70	2.50
Cayenne Long Red (Hot) —A leading sort for use in pickles, for canning and for drying. Fruits long, tapered, and very pungent60	2.00
Floral Gem (Bull Nose or Large Bell) — Hot, medium sized fruits, deep green	1.00	3.35
Golden California Wonder —Golden fleshed type	1.00	3.35
Hungarian Yellow Wax (Hot) —Yellow very early. Fruits long, tapered. Waxy light yellow75	2.50
Oakview Wonder (Early California Wonder) —Sweet, productive	1.20	4.00
Pimento (Sweet) — Standard variety for home and market garden. Fruits heart-shaped and very smooth75	2.50
Ruby King (Sweet) —A favorite for home and market garden. Fruits large and slightly tapered. Bright red65	2.25
Sweet Banana (Hungarian Yellow Wax Sweet) —Plants vigorous, erect. Fruit about 7" long, 2" thick	1.00	3.35
World Beater (Sweet) — An early sort. Fruits large, oblong; flesh thick and sweet. Bright red60	2.00

RADISH

	Oz.	¼ lb.
Improved Scarlet Globe —Very early sort, valuable for out of door culture and for forcing. Uniform, rich bright, scarlet, flesh white	\$.15	\$.45
Scarlet Turnip, White Tip —Popular variety, small top. Root bright scarlet with white area about the tip....	.15	.40
White Icicle —The best early white variety. Roots long, tapered, very white throughout20	.40

TOMATO

	Oz.	1/4 lb.
Bonny Best (73 days)—A general purpose tomato. Fruits evenly colored scarlet-red, medium large	\$.75	\$2.25
Bread O'Day (73-75 days)—Early wilt risistant, globe-shaped sort. Fruits large, scarlet of good quality90	3.00
Crimson Cushion (Red Beefsteak)	1.00	3.25
Dwarf Champion —Dwarf and treelike. Ideal for limited space. Pink fruit..	1.00	3.25
Earliana (64-66 days)—Particularly valuable for home garden and early market. Fruit medium size flattened90	3.00
Giant Tree —(Italian Potato Leaf)—A pink tomato of large size. The large smooth fruits have few seeds. Flesh is tender and mild	1/4 oz. \$1.20	3.50 12.00
Globe "A" (Forcing) —Improved. Developed by Ohio State Experiment Station—Pink fruits a little larger than regular Globe. Ships well. 1/4 oz. \$2.50	8.00	
Golden Queen —Large yellow fruit, mild flavor80	2.70
Jubilee —Fruits bright golden orange with few seeds. (72 days). 1/4 oz. \$.30; 1/2 oz. \$.50	.90	3.00
Manalucie (New) —Mid season red. Extra disease resistant	1.00	3.00
Marglobe (75-78 days)—Resistant to Fusarium wilt. Fruits uniform deep scarlet, globe shape and of distinct quality60	2.00
Master Marglobe (75-78 days)—HIGHLY resistant and heavily productive..	1.20	4.00
Michigan State Forcing —Developed at Michigan State College. Very productive under restricted light conditions. Fruits deep scarlet, globe shaped, are borne in clusters of five to eleven	1/4 oz. \$.50	2.00
Oxheart —Heart shaped. Pink fruit, mild flavor	1.10	3.70

RUTGERS

TOMATO — Continued

	Oz.	¼ lb.
Ponderosa (85 days)—One of the best for home use. Fruits purplish-pink, very fleshy with few seeds, of very mild flavor90	\$3.00
Pritchard (Scarlet Topper) —Wilt resistant, heavily productive. Fruits large globular, scarlet and well colored about the stem end75	2.50
Rutgers (78 days)—Highly recommended for second early maturing variety for canning and tomato juice. Fruits similar in shape to Marglobe. Uniformly colored flesh90	3.00
Stokesdale (70-73 days)—Early suitable for shipping. Fruits uniform deep scarlet, globe shape85	2.75

STOKESCROSS No. 5: Maturing 75 days, average size of fruit 4.7 ounces. This is perhaps the strongest F2 of the hybrid yet produced. It is recommended for market or for processing, and is an excellent producer. This new cross is a magnificent tomato which carries enthusiastic endorsement as one of the finest hybrids ever produced.

½ oz.	¼ oz.	1 oz.	¼ lb.
\$.75	\$1.25	\$3.50	\$12.00

	Oz.	¼ lb.
Stone Improved (85 days)—Very solid fruit scarlet red, flat shape65	\$2.20
Valiant —Early red90	3.00

HERBS

Customers will be buying herbs this spring as never before, for the garden and home magazines have been playing up their culinary uses as well as their garden beauty. Meet this demand with young plants in bands and flats.

Anise (Annual)—14-16 inches tall. Aromatic seeds used in flavoring.

Basil (Annual)—12 inches tall. Entire plant has fragrant spicy aroma. Used for seasoning.

Borage (Annual)—12 to 18 inches tall. Large thick leaves are used as a pot herb.

Coriander (Annual)—2 to 2½ ft. tall. Grown for seed. Used for flavoring in baking and confections.

Dill (Annual)—2 to 3 ft. tall. Chiefly grown for seed clusters used in pickling.

Sweet Fennel (Biennial)—3 to 4 ft. tall. Usually treated as an annual. Seed used for flavoring confections.

Tr. Pkt.	Oz.
\$.20	\$.60

Sweet Marjoram—1½-2 ft. tall. Grown for tender young leaves used in seasoning.

Sage (Perennial)—14-16 inches tall. The most commonly used of all herbs for seasoning.

Tr. Pkt.	½ oz.
\$.20	\$.60

Rosmary (Half Hardy Perennial)—2 to 4 ft. tall. Leaves used for seasoning.

Thyme (Hardy Perennial)—8 to 10 inches tall. Pungent flavor used in culinary seasoning.

Tr. Pkt.	¼ oz.
\$.20	\$.60

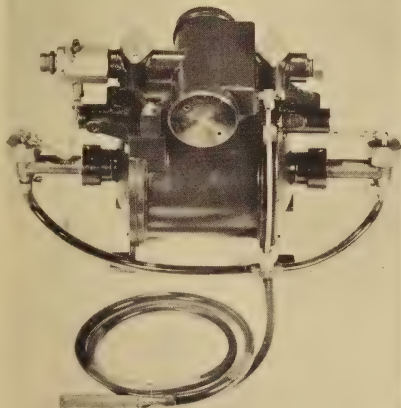

FERT-O-JECT AUTOMATIC FERTILIZER INJECTORS

This Automatic Fertilizer Injector is machine engineered to inject into the water system soluble fertilizers in proportions suitable for maximum plant growth. By using the Fert-O-Ject method of fertilization a mild application is applied each time plants are watered assuring a uniform application to all plants.

ELECTRA (5-10-3)

A **highly organic** fertilizer designed especially for florists. Contains major, minor and trace elements needed for plant growth.

Price: 80 lbs. \$6.00

HIDROPON

10% Nitrogen—12% Phos. Acid—25% Potash

A most unusual combination of many soluble plant foods. Trace elements mostly chelates and other products added but not claimed.

Price: \$8.00 (25 lbs.) \$12.00 (50 lbs.) \$20.00 (100 lbs.)

LIQUID "M" POWDERED

17% Nitrogen—24% Phos. Acid—18% Potash

Trace elements mostly as chelates and other products added but not claimed.

Price: \$8.00 (25 lbs.) \$12.00 (50 lbs.) \$20.00 (100 lbs.)

PANO-DRENCH 4

EFFECTIVE FOR THE CONTROL OF DAMPING-OFF

An excellent liquid soil drench used to control damping-off caused by soil borne fungi (especially Rhizoctonia) on flowers and vegetables. For use in all soils, sands; on flats, pots, benches and outside beds. Just one to two teaspoons diluted with 3 gallons of water produces effective control. A 4 oz. bottle makes up to 72 gallons of drench—treats 300-400 sq. ft.

Price: \$1.95 (1 oz.) \$5.95 (4 oz.) \$19.20 (16 oz.)

ROOTONE

A plant hormone powder for rooting cuttings and increasing root growth.

2 oz. \$1.00 1 lb. \$5.00

HORMODIN

#1 (Soft Cuttings) 1 lb. \$4.00
 #2 (Shrubs) 1 lb. 5.95
 #3 (Azalea—Evergreens) ½ lb. 5.95

INSECTICIDES, FUNGICIDES AND FUMIGANTS

ARAMITE 15W

For normal and resistant Red Spider.
4 lb. bag **\$3.25** Case (12 bags) **\$37.00**

CM-19

For control of Botrytis on Chrysanthemum, Gladiolus and other flowers.

40 lb. pail **\$40.00**

CHLOROZENILATE 25W

For Red Spider—not recommended for use on Hydrangeas. Use at rate of 1 lb. per 100 gal. water with a spreader.

4 lb. bag **\$5.80** Case (12 4-lb.) **\$52.80**

DDT 50W

For Thrip, Leaf Roller and other leaf eating pests. Also sow Bugs, Mum and Rose Midge. Use at the rate of 1 lb. per 100 gal.

4 lb. bag **\$2.72** Case (12 4-lb.) **\$28.80**

ENDRIN 1.6

Controls Aphids, Thrip, etc.

Gal. **\$12.70** Case (4 1-gal.) **\$46.72**

FERBAM (Ferimate)

Fungicide for leaf diseases and fungi.

3 lb. bag **\$2.10** Case (12 3-lb.) **\$21.60**

FULEX PARATHION FUMIGATOR

For Red Spider, Aphids and Thrip.

Carton 24 cans

2,000 Cu. ft. **\$11.50** 10,000 Cu. ft. **\$17.00**

5,000 Cu. ft. **\$14.50** 20,000 Cu. ft. **\$26.00**

FULEX APHID SMOKE FUMIGATOR

Carton 24 cans

For Aphid and adult White Fly.

2,000 Cu. ft. **\$11.00** 10,000 Cu. ft. **\$17.00**

5,000 Cu. ft. **\$14.00** 20,000 Cu. ft. **\$25.00**

FULEX SPIDER MITE FUMIGATOR

For Red Spider including some parathion resistant strains on Carnations, Chrysanthemums and Snaps.

2,000 Cu. ft. **\$11.50** 10,000 Cu. ft. **\$19.00**

5,000 Cu. ft. **\$14.50** 20,000 Cu. ft. **\$31.00**

ISOTOX-LINDANE 25W

For Aphids, Thrips, Spittlebugs and Symphylids. Use 8 oz. per 100 gal. with spreader.

4 lb. can **\$8.15**

KELTHANE EMULSION 18.5

For Red Spider and Cyclamen-Mite. Use at the rate of 1 pint per 100 gal. with a spreader.

Gal. **\$11.00** Case (4 1-gal.) **\$10.25** per gal.

KELTHAN 18.5W POWDER

4 lb. bag **\$5.80**

MALATHION 25W

For Red Spider, Aphid, Thrip, Scale Leaf Roller and Mealy Bug. 1½-2 lb. per 100 gal. except on Scale where amount should be doubled.

4 lb. bag **\$3.60**

NICO FUME LIQUID

For control of Aphids, Thrips and Leaf Miner. (8 lbs.)—1 gal. can **\$14.50**

NICOTEEEN FUMIGATORS (Fulex)

Effective on Aphids and most Thrip. Contains 14% Nicotene (Alkaloid). (Carton 12) 10,000 Cu. ft. **\$9.60** 20,000 Cu. ft. **\$16.20**

ORTHOCLIDE 50W (Captan)

Use as a control of leaf diseases.

5 lb. bag **\$5.75** Case (10 5-lb.) **\$42.50**

PLANT FUME 103

For control of Spider Mite, Aphid, Thrip.

5,000 Cu. ft. **\$12.00** (Carton of 36)

20,000 Cu. ft. **\$12.00** (Carton of 12)

PARATHION 15W

Kills Red Spider, Aphid, Thrip and leaf eating pests. Use at the rate of 1 lb. per 100 gal.

4 lb. bag **\$2.80** Case (12 4-lb.) **\$31.80**

PARZATE (Zineb)

Used for leaf diseases, such as rust, black spot or mildew.

3 lb. bag **\$3.30** Case (12 3-lb.) **\$35.00**

P-40—(2% Sodium Selenate)

For chewing and sucking insects on plants other than edible crops. Food crops not to be grown in treated area for 12 months.

25 lbs. **\$12.50** 50 lbs. **\$22.50** 100 lbs. **\$40.00**

SODIUM SELENATE (Pure)

4 oz. **\$4.00** 1 lb. **\$12.50**

SLUGIT

Sprayed over soil and plants this new material controls slugs and snails. Acts as both a stomach and contact insecticide. Is effective for about two weeks. Apply with a Bordeaux-type nozzle. One gallon covers about 4800 square feet.

1 gal. can **\$12.00**

SYSTOX

A systemic insecticide for control of Mites, Aphids and Leaf Hoppers, on certain plants.

1 gal. **\$32.00**

TRITHION 25W

For control of Aphids, Mealy Bugs, Scale and Red Spider. Use 1½ lbs. per 100 gal. Using a spreader is recommended.

5 lb. bag **\$9.50**

TEDION 25W

Controls Red Spider when used at the rate of 1 lb. per 100 gals.

2 lb. bag **\$4.75** Case (12 4-lb. bags) **\$46.00**

TERRACHLOR 75W

Controls Rhizoctonia Stem Rot by inhibiting fungus growth.

5 lb. bag **\$4.75** Case (10 5-lb. bags) **\$45.00**

VAPATONE-XX

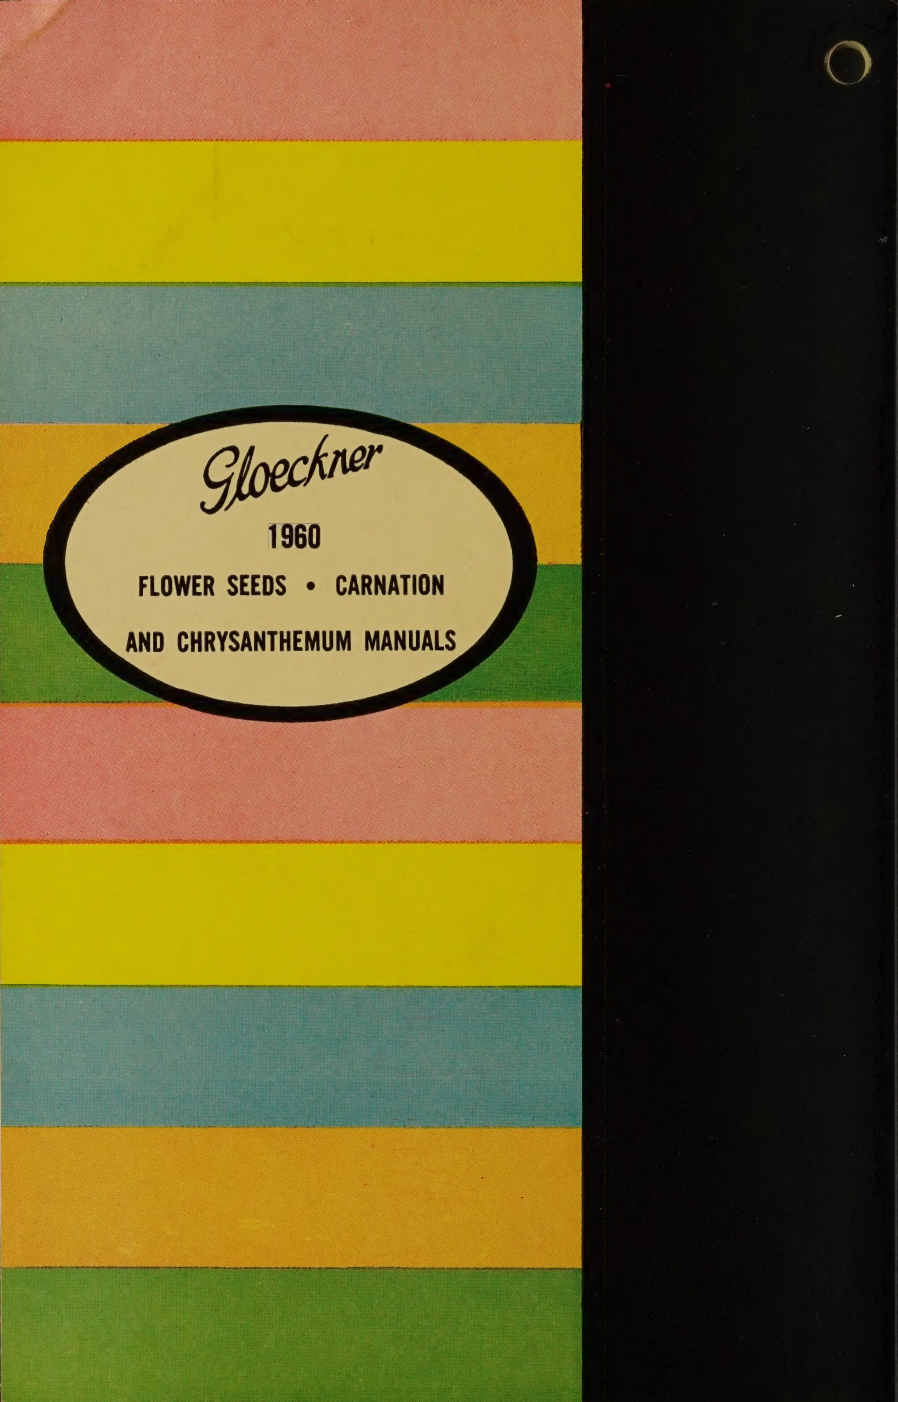

For controlling Aphids and Red Spider Mites. 1 gal. can **\$12.50**
